HEALTH & SAFETY POLICY STATEMENT

Our policy is, as far as is reasonably practicable, to provide and maintain safe and healthy working conditions, equipment and systems of work for all our employees, and to provide such information, training and supervision as they need for this purpose.

We are committed to the prevention of injury and ill health and we shall comply with all health and safety legislation and other requirements that are applicable to our business. We shall do this by complying with the OHSAS 18001 management system standard which shall ensure continual improvement is promoted within our health and safety management system. Objectives and targets to work towards will be set by top management and which shall be reviewed and updated periodically.

Importantly, we shall ensure health and safety duties are clearly allocated to cover all areas of our business and that there is sufficient representation among the workforce. General health and safety rules shall be established that are applicable and communicated to all persons undertaking work on our behalf. We also accept our responsibility for the health and safety of other people including visitors and contractors who may be affected by our activities.

The policy and rules will be kept up-to-date and will be revised every year to ensure they remain relevant to our business, particularly as the business changes in nature and size.
